

QCyberPrepare

Confidence before, during and after a cyber incident

During a cyber incident, there may be uncertainty that an organisation's files, documents and communication channels are available or clear of threat actors. QCyberPrepare (powered by CYGNVS) enables an organisation to securely store key documents (plans, policies, key contacts etc.) and effectively communicate outside the corporate network.

QCyberPrepare can be an organisation's cyber safe room, ensuring an efficient and coordinated approach when a cyber incident occurs.

QCyberPrepare, in partnership with CYGNVS, is built to empower organisations to be connected, confident, and in control before, during and after a cyber crisis.

Key benefits include:

- User friendly cyber response platform to help organisations proactively prepare for cyber incidents.
- Confidential and secure storage for critical documents and contact information, ensuring accessibility even if an organisational network becomes compromised during a cyber incident.
- An out-of-band solution with access controlled by your organisation.
- Invite and collaborate with your incident response team, including external advisors, to prepare for a cyber incident.
- 24/7 secure access to incident response documents and messaging capabilities so your business can launch incident response processes as soon as an incident occurs.
- Secure messaging and video call capabilities.

Opportunity

QCyberPrepare is available to all QBE Primary Cyber insurance customers.
